
WITHDRAWAL OF SUPPORT REMINDER

Instrument Affected: **Advanced Osmometer 3300**

All technical support for this model will cease from 1st Jan 2018.

Due to obsolescence and non availability of replacement parts, Vitech will no longer be able to provide effective support for this model of Osmometer from January 2018.

Instruments still on contract will be supported up until this time, but the lack of spare parts means that breakdowns due to component failure before this point may be unrepairable.

If this Instrument is currently fulfilling a critical role, urgent steps should be taken to procure a replacement. All these instruments are at least 10 years old and total failure can be expected at any time.

Due to high demand, Vitech cannot guarantee the availability of a Loan instrument as an interim measure in this event.

The direct replacement model for this Osmometer is the 3320.

For a quote please call: 01403 210400.
